

Advanced Diagnostics ADS2286 Subaru Update Software - IL ADA2286

AD DIAGNOSTICS™

**New Key Programming Software FREE UPDATE!!
Subaru ADS2286®**

January 2023

Advanced Diagnostics is pleased to announce a free update for ADS2286 Subaru. The new update adds the ability to program replacement keys in All Keys Lost situations when used in conjunction with the new ACC3013 Emulator cable.

What does the software do?
ADS2286 software allows for H-bladed keys and remotes to be added and programmed. The software can erase the keys (the key in the ignition is not erased) and program new keys (Max. of 4 Keys/Remotes). The software update provides the ability to program keys/remotes in All Keys Lost situations when used in conjunction with the ACC3013 Emulator cable. Programming is done directly via the OBD2 port. The software has been designed to bypass the security automatically in the background making it a seamless process when programming keys. This is a stand alone software with no need for an internet connection.

What else will I need?
A working REMOTE does not need to be present when programming remotes.
