Description HPC's Air Wedge? (AW-99) slides between the vehicle door and the weather stripping on the door frame. Then the pump is squeezed, inflating the Air Wedge? and separating the vehicle door from the frame. This provides more than ample room to insert a car opening tool, such as CO-78, CO-80, CO-81, CO-82 or CO-83. The Air Wedge? is made of a sturdy vinyl and equipped with a release valve. The Air Wedge? works exceptionally well with the HPC AutoSleeve? (AS-1)
