Description National Lock C7017 Self-locking cam slam. True convenience — release the key, and the self-locking component automatically returns the lock, along with SlamCAM (patent 9,605,455), to the locked position. SlamCAM, a spring-loaded latch, along with the self-locking component, converts CompX National cam locks (C8051-C8075) into self-locking. Note: Using the self-locking component adds 5/16" to the length of the lock. INSTALLATION NOTE: For C8051 and C8052, the washer must be installed between the cylinder and the self-locking component to secure the lock plug properly.
