Description HPC's Pistolpick? is designed to easily rake open pin and disc tumbler locks. Rapid squeezing of the trigger bounces the pick needle, raising the pins or discs to the shear line. All you add is proper tension, and the lock is open. All parts, including the main housing, are made from nickel-plated cold rolled steel for protection against rust and to provide an attractive, high quality pistol finish. The Pistolpick? comes with 3 pick blades and 2 tension wrenches. An optional leather holster case is available.
