Description These solid brass padlocks perform in even the harshest outdoor or corrosive environments. Hardened boron alloy shackles offer superior cut resistance, while dual stainless steel ball bearing locking mechanism resists pulling and prying. Rekeyable five- or six-pin brass cylinders and serrated pins are pick resistant with tens of thousands of key changes. Shackles are chrome plated for corrosion resistance; Weatherbuilt? Padlock Protection is available for the 2" and 1-3/4" model, gives added corrosion resistance.
