Description HPC's Double "L" Tools are highly versatile car openers. With an upward hook on one end and an downward hook on the opposite leg, they are effective on horizontal and vertical rods as well as on bell cranks and the GM latch. The hooks are laminated with a slip-resistant coating, they easily grab and bind linkages from above or below. Their design allows them to reach around many shields. For narrow door panels, use the Short Double "L"(CO-72), for wider door panels, use the Stretch Double "L"(No. CO-71).
