Description The Switch Stick is a five foot (1.5m) long bendable tool with a unique hook end designed to open cars from the inside. This tool slips into a vehicle between the window and door frame. Once inside, the Switch Stick acts as a third hand allowing you to flip switches, lift buttons, and hook handles. The hook has a protective coating and rubber cap, so the vehicle owner won't have to worry about a damaged interior. The Switch Stick is ideal for vehicles with side impact airbags where customers may be hesitant to have tools enter the door cavity. A must for vehicles with flush finger-tip lock switches such as Lexus and Volvo.
